Climate Control Group's EnviroKIT® Wins Prestigious 2025 AHR Expo Innovation Award for Cooling

Oklahoma City, Okla. (Oct. 28, 2024) — Climate Control Group (CCG) is honored to announce that one of its newest products, the EnviroKIT® Comprehensive Retrofit Solution, has been awarded the **2025 AHR Expo Innovation Award for Cooling**, recognizing its groundbreaking impact on the HVAC industry. The EnviroKIT® will be featured at the 2025 AHR Expo in Booth 3927.

The EnviroKIT® is a solution offered as part of the IEC product line and is a revolutionary retrofit solution for aging vertical stack fan coil units, particularly in sectors like hospitality, multifamily housing and senior living. It is designed to address a critical need in the marketplace: a quick, simple and budget-friendly solution that restores fan coil unit performance without the need for extensive demolition or major renovations that prioritizes keeping rooms operational and minimizes revenue disruptions.

“EnviroKIT® was developed to meet the specific needs of hospitality and similar industries where room downtime has a direct impact on revenue and guest satisfaction,” stated Shane Lantz, Climate Control Group representative. “Because it is easy to install with minimal disruption, EnviroKIT® provides a transformative solution that aligns with Climate Control Group’s commitment to efficient HVAC technology delivered with sustainable and simple solutions.”

The AHR Expo Innovation Award recognizes industry leaders advancing HVACR technologies with cutting-edge products, and EnviroKIT® stands out as a prime example of innovation for high-demand environments.

In addition to the AHR Expo Innovation Award, EnviroKIT® has also received the **2024 Dealer Design Award from ACHR News** in the Light Commercial Equipment category, further solidifying its impact as a leader in HVAC retrofit solutions.

Some key features of the award-winning IEC EnviroKIT® include:

- **High-efficiency EC motors and blower housings:** For optimized energy savings and performance.

- **Comprehensive kit option:** Includes control kits, double-sloped stainless steel drain pans, and valve packages, encased in durable 20-gauge galvanized steel for easy, reliable installation.
- **Nearly plug-and-play compatibility:** Works seamlessly with existing thermostats, allowing for rapid installations with minimal interruption to room availability.
- **Flexible configurations:** Available in multiple cooling and heating coil options to adapt to varied environmental demands.

EnviroKIT® brings together the essential aftermarket components needed to sustainably retrofit vertical stack fan coils without the need for full-unit replacements. With a kitted solution that provides quick, high-quality results, Climate Control Group has set a new standard for HVAC retrofits that prioritizes sustainability, efficiency, and end-user comfort without sacrificing uptime. For more information on EnviroKIT® and to see it live at the 2025 AHR Expo, visit Booth 3927 or go to www.climatecontrolgroup.com/envirokit.
